ABOUT ME

Self-taught professional with hands-on experience in Linux, Bash, Burp Suite, and strong networking skills including TCP/IP, subnetting, and packet analysis. Currently expanding full-stack development skills to build a solid foundation for a cybersecurity and penetration testing career, with a strong ability to learn quickly and solve complex technical problems.

SKILLS

◆ Web Development

- JavaScript, TypeScript, React.js, Node.js, Express.js, RESTful APIs, Socket.IO (Real-Time Communication)

◆ Databases

- SQL, MySQL, Prisma ORM, Sequelize ORM

◆ Networking & Cybersecurity

- TCP/IP, Subnetting, Packet Analysis, Networking Fundamentals, Burp Suite, etc..

◆ Encryption & Security Basics

- Understanding of AES, RSA/ECDHE basics, & HTTPS workflow

◆ Linux & Scripting

- Linux CLI, File System & Permissions, Process & , Basic Linux Security

◆ System Architecture Basics

- Client-Server architecture, API design fundamentals

◆ Soft Skills

- Problem-Solving, Fast Learner, Communication, Teamwork

Education & Certifications

◆ Education

- Baccalauréat studies (2018–2019)
- Certificates & Trainings
- Full Stack Web Development Certificate — Rebootcamp Tunisia (December 2025)
- Phone Hardware Repair Certificate (June 2020)
- English Certificate (2014)
- Networking Fundamentals (Self-Learning)
- Cybersecurity Basics (Self-Study)

LANGUAGE

- English - B1
- French - B1
- Arabic - Native

PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER INTERN

REBOOTKAMP TUNISIA (RBK) — TUNIS, TUNISIA

August – December 2025

- Built responsive web interfaces using React.js, TypeScript, HTML, and CSS.
- Developed and integrated REST APIs with Node.js and Express.js.
- Worked with MYSQL and SQL databases for data management.
- Collaborated using GitHub and Agile/Scrum workflows.
- Contributed to improving and maintaining existing web applications.

PROJECTS

KOZONE – COMPREHENSIVE PLATFORM FOR SECURITY RECONNAISSANCE AND VULNERABILITY SCANNING

- Developed a platform integrating 30+ security tools within a unified API
- Automated Subdomain Discovery and API Endpoint Discovery
- Web vulnerability testing: XSS, SQL Injection, CORS Misconfiguration, JWT, WebSocket
- Security analysis of Client-Side and modern web applications
- Supported Real-Time Streaming Responses for immediate scan results
- Full database integration for storing and managing scan results
- Built backend using Node.js, TypeScript, Express
- Utilized Playwright for automated testing and browser behavior analysis
- Designed a modern interface targeting Bug Bounty Hunters and Penetration Testers

REGEEELY – MARKETPLACE WEB & MOBILE APPLICATION

Full-Stack Developer (Team Project) — Tunisia

- Built full marketplace platform connecting providers, shops, and customers.
- Developed admin dashboard with React, TypeScript, Vite.
- Built mobile app with React Native & Expo, integrated with APIs.
- Implemented RESTful & real-time features with Node.js, Express, Socket.IO.
- Managed MySQL database using Prisma ORM.
- Added JWT authentication with RBAC and secure token refresh.
- Integrated Cloudinary for media storage and optimized delivery.
- Applied key security best practices: rate limiting, input sanitization, CORS, XSS/CSRF.

STUDENT HOUSING BOOKING SYSTEM

Full-Stack Developer (Team Project) — Tunisia

- Developed a full-stack student housing booking platform with React, TypeScript, Node.js, Express, MySQL.
- Implemented authentication, bookings, payments, reviews, maintenance requests, and real-time messaging/notifications using Socket.IO.
- Collaborated in a team using GitHub and Agile workflow to deliver a responsive, user-friendly application.
